EXPERIENCE

Envoy | Software Engineer, Visitor Management

Remote · Nov 2024 – Present

- Designed and shipped **Envoy's Codebase Intelligence platform** end-to-end across four phases: **Amazon S3 Vectors** infrastructure on AWS (Pulumi/Terraform), an **Amazon Bedrock Knowledge Bases** store using **Titan Text Embeddings V2**, and a Python **MCP server** exposing six retrieval tools to **Anthropic Claude**. Indexed 22 internal repositories (~87,500 **Tree-sitter** AST chunks) with top-1 retrieval averaging **0.785** at **~\$0.03/month**, replacing per-engineer 6–8 GB local vector databases.
- Led the migration of the visitor-management dashboard from **Ember.js / Glimmer** to **React 19** across the visitor profile, printer overview, and new screeners, visits, matching-rules, and documents tabs — using **Module Federation 2.0**, **TanStack Query v5**, **Radix UI**, **Tailwind**, **Luxon**, and **MSW v2**.
- Shipped the **Visitor Profile Merge** feature end-to-end across ~20 tickets (visitor directory, merge UI, Rails APIs) and the **Block List V2** identity-matching lifecycle (expiration dates, disable toggle, search, deletion) across two quarters.
- Owned the frontend for a ChargeBee-feature-code-driven subscription gate on Envoy's Visitors Basic plan — replacing fragile SKU-name matching with a counter table, gate-state API, 75% / 100% threshold mailer, and reset cron — shipped across six PRs spanning Rails and Ember in a single sprint.
- Scoped Envoy's Visitors AI roadmap (~30 child tickets covering AI drafting, fuzzy matching, NL analytics, audit log, and smart dedup) and the **AgentLock** initiative for phase-based agent permissions with observability-first risk gating.
- Resolved ~20 customer-facing bug tickets affecting Fortune 500 accounts including **Blue Origin**, **Tesla**, and **NVIDIA** — using TDD with **RSpec** on the Rails side and **Vitest + MSW** on the React side, with mutation-tested verification against staging via Kubernetes pod exec.
- Authored **28+ internal technical documents** adopted cross-team — including an AI-tooling onboarding guide, a six-layer AI memory architecture reference, an AI coding-agent observability writeup, and the Engineering Innovation Program's cross-team companion guide.
- Shipped **337 merged pull requests** across nine internal repositories in 18 months — Ruby on Rails, Ember Octane / Glimmer / GTS, React 19, **Cerbos** authorization, and Pulumi / Terraform IAM — sustaining 5+ PR/week cadence on stacked-PR (**Graphite**) and worktree-based parallel-dev workflows.

Tech: Ruby on Rails · Ember.js (Octane / Glimmer / GTS) · React 19 · TypeScript · PostgreSQL · Redis · Kafka · Sidekiq · Cerbos · TanStack Query · Module Federation · Tailwind · Radix UI · MSW · Vitest · RSpec · Playwright · AWS (Bedrock, S3 Vectors, IAM) · Kubernetes · Pulumi · Terraform · OpenTelemetry · Datadog · Graphite · Anthropic Claude / Model Context Protocol

Sprout Social | Front-End Engineer

Chicago, IL · May 2022 – April 2024

- Led front-end migration of key components from **Flow** to **TypeScript**, improving code quality through stricter type checking and cutting daily-workflow debugging time by ~20%.
- Built and maintained reusable **React** components in the **Seeds** shared library, standardizing UI patterns across teams and reducing feature development time by 3+ days per project.
- Collaborated with product managers and designers to integrate UX/UI improvements across the platform; conducted code reviews and mentored junior developers on best practices.
- Built a React UI for bulk sentiment updates, allowing users to reclassify up to **1,000 messages** at once with Redux state management and Axios — improving workflow speed by ~30%; optimized component rendering with React memoization.
- Developed dynamic **Query Builder Form** components in React + TypeScript for AI-driven keyword suggestions using **OpenAI's GPT** model; applied debounce + async/await and React Hooks to cut query setup time significantly.
- Created a data-filtering tool with **React Context API**, Redux, and React Router for seamless message exploration; used **SCSS** for responsive styling and virtualized lists for performance, increasing user engagement ~30%.

The Walt Disney Company | Software Engineering Intern

Remote · May 2021 – Nov 2021

- Maintained and improved site quality across multiple **ABC news stations**: fixed broken links, improved navigation structures, and addressed responsive UI/UX issues using React and CSS Flexbox/Grid.
- Developed a dynamic **Banner-Maker** tool for ESPN — reusable React banner components with Redux-managed state and team/player API integration — streamlining banner creation workflows by ~35%.
- Led front-end design and implementation for a Student Loan Refinance project: responsive React UI, input validation, and API integration with the back-end team — reducing form validation errors by ~60%.
- Partnered with **Applitools** stakeholders on accessibility: screen-reader testing and WCAG compliance, boosting accessibility coverage by ~70%.

Credit Karma | Full-Stack Web Developer Intern

San Francisco, CA · Jan 2020 – Dec 2020

- Led front-end design and implementation for the Student Loan Refinance project, focusing on responsive UI components with React and input validation logic; integrated APIs with the back-end team — improving application performance and reducing form validation errors by ~60%.
- Collaborated with **Applitools** stakeholders on accessibility best practices: thorough screen-reader testing and WCAG compliance — boosting accessibility coverage by ~70%.

SKILLS

Languages	TypeScript, JavaScript (ES6+), Python, Ruby, HTML5, CSS3, SQL
Frameworks & UI	React 19, Next.js, Ember.js (Octane / Glimmer / GTS), Ruby on Rails, FastAPI, Node.js, Express, Tailwind, Radix UI, SCSS, Three.js, Framer Motion
AI & Data	Model Context Protocol (MCP), Anthropic Claude SDK, OpenAI SDK, Amazon Bedrock, S3 Vectors, Titan Text Embeddings V2, Tree-sitter AST chunking, ChromaDB, Pinecone, LangChain
Cloud & Infra	AWS (Bedrock, S3, IAM), Pulumi, Terraform, Kubernetes, Docker, OpenTelemetry, Datadog, Vercel
Data Stores	PostgreSQL, Redis, Kafka, Sidekiq, MongoDB
Build & State	Module Federation 2.0, Vite, Webpack 5, TanStack Query v5, Redux Toolkit, MSW v2, GraphQL, REST
Testing & CI	Vitest, RSpec, Playwright, Jest, Cypress, Graphite (stacked PRs), GitHub Actions, CircleCI
AuthZ & Security	Cerbos, OAuth, JWT, WCAG accessibility

EDUCATION

Dominican University
B.S. Computer Science

River Forest, IL
Aug 2018 – May 2022

PROJECTS

TraderDan — Automated Trading System [\[github\]](#)

Python · Next.js · FastAPI · Anthropic Claude · TradeLocker · PostgreSQL · Optuna · ChromaDB

Production trading system managing real capital across five active prop-firm accounts and trading XAUUSD on H1/M15 via TradeLocker. Architecture spans a backtest engine, live signal generator, FastAPI webhook execution server with prop-firm risk gates (daily-loss, drawdown, ATR-spike, news blackout, weekend closer), a 14-agent AI team led by an OpenClaw CEO orchestrator (Anthropic Claude tool use + Gemini Flash routing), an eval harness with drift detection, semantic memory in ChromaDB, and a Next.js 15 dashboard with 17 pages for live monitoring. 5,696+ tests; stacked-PR workflow.

Blue Ridge Canine Academy [\[link\]](#)

React · Node.js · Express · MongoDB · Acuity Scheduling

Freelance build (\$800) for a local dog trainer: a full-stack scheduling and payments platform. React frontend, Node.js / Express backend, MongoDB persistence; wireframed in Figma and hosted on GoDaddy.

CERTIFICATIONS

- React — The Complete Guide (Hooks, React Router, Redux), Second Edition — *O'Reilly*
- React 101 Basics — *Codecademy*
- Problem Solving Basics — *HackerRank*
- Technical Support Fundamentals — *Coursera*
- Android Studio 101 — *Team Tree House*

HONORS & AWARDS

- Won **1st place** at the Google × Code Nation Hackathon, guiding local students in HTML, CSS, and JavaScript to build passion projects.
- Won the **24-hour Code for Good Hackathon** by JP Morgan, leading a front-end team to ship a dynamic site for the Girls in the Game non-profit.
- Won **2nd place** at the ACCA Programming Contest (Associated Colleges of the Chicago Area) — a result-setting finish for Dominican University.
- Completed the **MLT Career Program**, sharpening leadership, networking, and communication skills.
- Mentored high school students in STEM and technology at **Code Nation**.
- Featured in a **Credit Karma** commercial on personal credit recovery; also appeared in a **JumpStart** rebranding spot on early-career recruiting.
